Part II: Certification	<p>II. Health information</p> <p>I, the undersigned official veterinarian, hereby certify that:</p> <p>II.1. The semen collection centre(1), in which the semen described in Part I was collected, processed and stored, for trade was approved and supervised by the competent authority in accordance with Chapters I(I)(1) and I(II)(1) of Annex D to Directive 92/65/EEC(2);</p> <p>II.1.1. during the period commencing 30 days prior to the date of first collection of the semen described in Part I until the date the fresh or chilled semen was dispatched or until the 30 days minimum storage period for frozen semen elapsed, the semen collection centre:</p> <ul style="list-style-type: none"> II.1.1.1. was situated on the territory or in the case of regionalisation in a part of the territory(3) of a Member State which was not considered to be infected with African horse sickness in accordance with Article 5(2)(a) and(b) of Directive 2009/156/EC(4); II.1.1.2. fulfilled the conditions for a holding laid down in Article 4(5) of Directive 2009/156/EC; II.1.1.3. contained only equidae which were free of clinical signs of equine viral arteritis and contagious equine metritis; <p>II.2. Only equidae satisfying the conditions laid down in Articles 4 and 5 or Articles 12 to 16 of Directive 2009/156/EC have been admitted onto the centre.</p> <p>II.3. The semen described in Part I was collected from donor stallions, which:</p> <p>II.3.1. did not show any clinical sign of an infectious or contagious disease at the time of admission onto the semen collection centre and on the day the semen was collected;</p> <p>II.3.2. were kept for a period of 30 days prior to the date of semen collection in holdings where no equine showed any clinical sign of equine viral arteritis or contagious equine metritis during that period;</p> <p>II.3.3. were not used for natural mating during a period of at least 30 days prior to the date of first semen collection and from the dates of the first sample referred to in point II.3.5.1., II.3.5.2. or II.3.5.3. until the end of the collection period;</p> <p>II.3.4. underwent the tests, which meet at least the requirements of the relevant Chapter of the Manual of Diagnostic Tests and Vaccines for Terrestrial Animals of the OIE, carried out in a laboratory which is recognised by the competent authority and has the tests referred to hereinafter included in its accreditation in accordance with Article 12 of Regulation (EC) No 882/2004(5), as follows:</p> <ul style="list-style-type: none"> II.3.4.1. for equine infectious anaemia (EIA), an agar-gel immuno-diffusion test (AGID or Coggins test) or an enzyme-linked immunosorbent assay (ELISA) for equine infectious anaemia with a negative result; II.3.4.2. for equine viral arteritis (EVA), (3) <input type="checkbox"/> either [II.3.4.2.1. a serum neutralisation test with a negative result at a serum dilution of one in four;] (3) <input type="checkbox"/> and/or [II.3.4.2.2. a virus isolation test, polymerase chain reaction (PCR) or real-time PCR with a negative result on an aliquot of the entire semen of the donor stallion;] II.3.4.3. for contagious equine metritis (CEM), an agent identification test carried out on three specimens (swabs) taken from the donor stallion on two occasions with an interval of not less than 7 days at least from the penile sheath (prepuce), the urethra and the fossa glandis; The samples were in no case taken earlier than 7 days (systemic treatment) or 21 days (local treatment) after antimicrobial treatment of the donor stallion and were placed in transport medium with activated charcoal, such as Amies medium, before dispatch to the laboratory where they were subjected with negative result to a test for:
------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Part II: Certification	II. Health information		
	(3)	<input type="checkbox"/> either	[II.3.4.3.1. the isolation of Taylorella equigenitalis after cultivation under microaerophilic conditions for at least 7 days, set up within the 24 hour period after taking the specimens from the donor animal, or the 48 hour period where the specimens are kept cool during transport;]
	(3)	<input type="checkbox"/> and/or	[II.3.4.3.2. the detection of genome of Taylorella equigenitalis by PCR or real-time PCR, carried out within the 48 hour period after taking the specimens from the donor animal;]
	II.3.5.		were subjected with the results specified in point II.3.4. in each case to at least one of the test programmes detailed in points II.3.5.1., II.3.5.2. and II.3.5.3., as follows:
	(6)	<input type="checkbox"/>	[II.3.5.1. The donor stallion was continuously resident on the semen collection centre for a period of at least 30 days prior to the date of the first collection and during the period of collection of the semen described above and no equidae on the semen collection centre came into direct contact with equidae of lower health status than the donor stallion. The tests described in point II.3.4. were carried out on samples taken(7) from the donor stallion at least once a year at the beginning of the breeding season or prior to the first collection of semen intended for trade in fresh, chilled or frozen semen and not less than 14 days following the date of the commencement of the residence period of at least 30 days prior to the date of first semen collection.]
	(6)	<input type="checkbox"/>	[II.3.5.2. The donor stallion was resident on the semen collection centre for a period of at least 30 days prior to the date of the first collection and during the period of collection of the semen described in Part I, but has left the centre under the responsibility of the centre veterinarian for a continuous period of less than 14 days, and/or other equidae on the semen collection centre came into direct contact with equidae of lower health status. The tests described in point II.3.4. were carried out on samples taken(7) from the donor stallion at least once a year at the beginning of the breeding season or prior to the first collection of semen intended for trade in fresh, chilled or frozen semen and not less than 14 days following the date of the commencement of the residence period of at least 30 days prior to the date of first semen collection, and during the period of collection of the semen intended for trade in fresh, chilled or frozen semen the donor stallion was subjected to the tests described in point II.3.4., as follows: (a) for equine infectious anaemia, one of the tests described in point II.3.4.1. was last carried out on a sample of blood taken(7) not more than 90 days prior to the date of the collection of the semen described in Part I; (b) for equine viral arteritis: (3) <input type="radio"/> either [one of the tests described in point II.3.4.2. was last carried out on a sample taken(7) not more than 30 days prior to the date of the collection of the semen described in Part I;] (3) <input type="radio"/> or [one of the tests described in point II.3.4.2.2 was carried out on an aliquot of the entire semen of the donor stallion taken(7) not more than six months prior to the date of the collection of the semen described in Part I and a blood sample taken(7) from the donor stallion during the six months period reacted with a positive result in a serum neutralisation test for equine viral arteritis at a serum dilution of more than one in four;] (c) for contagious equine metritis, one of the tests described in point II.3.4.3. was last carried out on three specimens (swabs) taken(7) not more than 60 days prior to the date of the collection of the semen described in Part I (3) <input type="radio"/> either [on two occasions at least 7 days apart;] (3) <input type="radio"/> or [on a single occasion and subjected to a PCR or real-time PCR.]]

Part II: Certification	II. Health information																					
	(3) o either (3) o or	[II.4. No antibiotics were added to the semen;] [II.4. The following antibiotic or combination of antibiotics was added to produce a concentration in the final diluted semen of not less than(8): _____]; II.5. The semen described in Part I was: II.5.1. collected, processed, stored and transported under conditions which comply with the requirements of Chapters II(I)(1) and III(I) of Annex D to Directive 92/65/EEC; II.5.2. in the case of frozen semen, stored for a minimum period of 30 days from the date of collection of the semen; II.5.3. sent to the place of loading in a sealed container in accordance with point 1.4 of Chapter III(I) of Annex D to Directive 92/65/EEC and bearing the number indicated in Box I.19.																				
<p>Notes This animal health certificate shall be completed according to the notes for the completion of certificates provided for in Chapter 2 of Annex I to Commission Implementing Regulation (EU) 2020/2235.</p> <p>Part I:</p> <ul style="list-style-type: none"> Box I.11: The place of dispatch shall correspond to the semen collection centre of origin of the semen. Box I.12: The place of destination shall correspond to the semen collection or storage centre or to the holding of semen destination. Box I.19: The identification of container and seal number shall be indicated. Box I.30: The donor identity shall correspond to the official identification of the animal. The date of collection shall be indicated in the following format: dd/mm/yyyy. <p>Part II:</p> <p>Guidance for the completion of the table in point II.3.6.: Abbreviations:</p> <table> <tbody> <tr><td>EIA-1</td><td>Equine infectious anaemia (EIA) testing first occasion</td></tr> <tr><td>EIA-2</td><td>EIA testing second occasion</td></tr> <tr><td>EVA-B1</td><td>Equine viral arteritis (EVA) testing on blood sample first occasion</td></tr> <tr><td>EVA-B2</td><td>EVA testing on blood sample second occasion</td></tr> <tr><td>EVA-S1</td><td>EVA testing on semen sample first occasion</td></tr> <tr><td>EVA-S2</td><td>EVA testing on semen sample second occasion</td></tr> <tr><td>CEM-11</td><td>Contagious equine metritis (CEM) testing first occasion first sample</td></tr> <tr><td>CEM-12</td><td>CEM testing first occasion second sample taken 7 days after CEM-11</td></tr> <tr><td>CEM-21</td><td>CEM testing second occasion first sample</td></tr> <tr><td>CEM-22</td><td>CEM testing second occasion second sample taken 7 days after CEM-21</td></tr> </tbody> </table> <p>Instructions: For each semen identification in column A in the example below, the test programme (points II.3.5.1., II.3.5.2. and/or II.3.5.3.) shall be described in column B and columns C and D shall be completed with the dates required. The dates when samples were taken for laboratory testing prior to the first collection of the semen described in Part I, as required in points II.3.5.1., II.3.5.2. and II.3.5.3., shall be entered in the upper line of columns 5 to 9 of the table, this being the boxes marked with EIA-1, EVA-B1 or EVA-S1 and CEM-11 and CEM-12 in the example below. The dates when samples were taken for repeat laboratory testing as required in accordance with point II.3.5.2. or II.3.5.3. shall be entered in the lower line of columns 5 to 9 in table, this being the boxes EIA-2, EVA-B2 or EVA-S2 and CEM-21 and CEM-22 in the example below.</p>			EIA-1	Equine infectious anaemia (EIA) testing first occasion	EIA-2	EIA testing second occasion	EVA-B1	Equine viral arteritis (EVA) testing on blood sample first occasion	EVA-B2	EVA testing on blood sample second occasion	EVA-S1	EVA testing on semen sample first occasion	EVA-S2	EVA testing on semen sample second occasion	CEM-11	Contagious equine metritis (CEM) testing first occasion first sample	CEM-12	CEM testing first occasion second sample taken 7 days after CEM-11	CEM-21	CEM testing second occasion first sample	CEM-22	CEM testing second occasion second sample taken 7 days after CEM-21
EIA-1	Equine infectious anaemia (EIA) testing first occasion																					
EIA-2	EIA testing second occasion																					
EVA-B1	Equine viral arteritis (EVA) testing on blood sample first occasion																					
EVA-B2	EVA testing on blood sample second occasion																					
EVA-S1	EVA testing on semen sample first occasion																					
EVA-S2	EVA testing on semen sample second occasion																					
CEM-11	Contagious equine metritis (CEM) testing first occasion first sample																					
CEM-12	CEM testing first occasion second sample taken 7 days after CEM-11																					
CEM-21	CEM testing second occasion first sample																					
CEM-22	CEM testing second occasion second sample taken 7 days after CEM-21

Part II: Certification	<p>II. Zdravotné informácie</p> <p>Ja, podpísaný úradný veterinárny lekár, týmto potvrdzujem, že:</p> <p>II.1. Inseminačná stanica na odber spermy(1), na ktorej bola sperma opísaná v časti I odobraná, spracovaná a skladovaná na účely obchodovania, bola schválená príslušným orgánom a je pod jeho dohľadom v súlade s kapitolou I oddielom I bodom 1 a kapitolou I oddielom II bodom 1 prílohy D k smernici 92/65/EHS(2);</p> <p>II.1.1. počas obdobia začínajúceho 30 dní pred dátumom prvého odberu spermy opísanej v časti I a do dátumu, keď bola čerstvá alebo chladená sperma odoslaná, alebo do dňa, keď vypršalo 30-dňové minimálne obdobie skladovania mrazenej spermy, inseminačná stanica na odber spermy:</p> <ul style="list-style-type: none"> II.1.1.1. sa nachádzala na území, alebo v prípade regionalizácie v časti územia(3) členského štátu, ktoré(-á) nebolo(-a) považované(-á) za infikované(-ú) africkým morom koní v súlade s článkom 5 ods. 2 písm. a) a b) smernice 2009/156/ES(4); II.1.1.2. spĺňala podmienky pre chov stanovené v článku 4 ods. 5 smernice 2009/156/ES; II.1.1.3. nachádzali sa v nej len koňovité, ktoré nevykazovali klinické príznaky vírusovej arteritídy koní a infekčnej metritídy koní; <p>II.2. Na inseminačnú stanicu boli prijaté iba koňovité spĺňajúce podmienky stanovené v článkoch 4 a 5 alebo v článkoch 12 až 16 smernice 2009/156/ES.</p> <p>II.3. Sperma opísaná v časti I bola odobraná darcovským žrebcom, ktoré:</p> <p>II.3.1. nevykazovali v čase prijatia na inseminačnú stanicu na odber spermy a v deň odberu spermy žiadne klinické príznaky infekčnej alebo nákažlivej choroby;</p> <p>II.3.2. boli držané počas obdobia 30 dní pred dátumom odberu spermy v chovoch, v ktorých počas uvedeného obdobia žiadne koňovité nevykazovali klinické príznaky vírusovej arteritídy koní ani infekčnej metritídy koní;</p> <p>II.3.3. sa počas obdobia minimálne 30 dní pred dátumom prvého odberu spermy a od dátumov odberu prvej vzorky uvedených v bodoch II.3.5.1, II.3.5.2 alebo II.3.5.3 až do konca obdobia odberu nepoužili na prirodzené pripúšťanie;</p> <p>II.3.4. boli podrobené týmto testom, ktoré spĺňajú minimálne požiadavky príslušnej kapitoly Príručky diagnostických testov a vakcín pre suchozemské zvieratá Svetovej organizácii pre zdravie zvierat (OIE), vykonaným v laboratóriu, ktoré je uznané príslušným orgánom a ktoré má nižšie uvedené testy vo svojej akreditácii v súlade s článkom 12 nariadenia (ES) č. 882/2004(5):</p> <ul style="list-style-type: none"> II.3.4.1. pokial ide o infekčnú anémiu koní (EIA), imunodifúzny test v agarovom géli (AGID alebo Cogginsov test) alebo enzymové imunosorbentové stanovenie (ELISA) na infekčnú anémiu koní, s negatívnym výsledkom; II.3.4.2. pokial ide o vírusovú arteritídu koní (EVA), <p>(3) <input type="checkbox"/> budť [II.3.4.2.1. sérumneutralizačný test, s negatívnym výsledkom, pri zriedení séra v pomere 1 : 4;]</p> <p>(3) <input type="checkbox"/> a/alebo [II.3.4.2.2. test na izoláciu vírusu, polymerázová reťazová reakcia (PCR) alebo PCR v reálnom čase, s negatívnym výsledkom, na alikvotnej časti celej spermy darcovského žrebcu;]</p> <p>II.3.4.3. pokial ide o infekčnú metritídu koní (CEM), test na identifikáciu pôvodcu vykonaný na troch vzorkách (výteroch) odobraných darcovskému žrebcovi dvakrát s odstupom najmenej 7 dní aspoň z predkožkového vaku (predkožky), močovej rúry a fossa glandis; Vzorky sa v žiadnom prípade neodobrali skôr ako 7 dní (systémová liečba) alebo 21 dní (lokálna liečba) po antimikrobiálnej liečbe darcovského žrebcu a boli umiestnené v transportnom médiu s aktívnym uhlím, ako je Amiesovo médium, pred odoslaním do laboratória, kde boli, s negatívnym výsledkom, podrobené testu na:</p> <p>(3) <input type="checkbox"/> budť [II.3.4.3.1. izoláciu baktérie <i>Taylorella equigenitalis</i> po kultivácii v mikraerofílnych podmienkach počas obdobia najmenej 7 dní vykonanej do 24 hodín po odbere vzoriek z darcovského zvieratá alebo do 48 hodín, ak sa vzorky počas prepravy uchovávali v chlade;]</p>
------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Part II: Certification	II. Zdravotné informácie	
	(3) <input type="checkbox"/> a/alebo [II.3.4.3.2. zistenie genómu baktérie Taylorella equigenitalis polymerázovou reťazovou reakciou (PCR) alebo PCR v reálnom čase vykonanou do 48 hodín po odbere vzoriek z darcovského zvieratá;]	
	II.3.5. boli podrobené, s výsledkami špecifikovanými v bode II.3.4, v každom z prípadov aspoň jednému z programov testovania podrobne opísaných v bodoch II.3.5.1, II.3.5.2 a II.3.5.3:	
	(6) <input type="checkbox"/> [II.3.5.1. Miestom nepretržitého pobytu darcovského žrebeca bola inseminačná stanica na odber spermy počas obdobia aspoň 30 dní pred dátumom prvého odberu spermy a počas obdobia odberu spermy opísanej vyššie a žiadne koňovité v inseminačnej stanici na odber spermy neboli v priamom kontakte s koňovitými, ktoré mali nižší zdravotný štatút ako príslušný darcovský žrebec.	
	Testy opísané v bode II.3.4 boli vykonané na vzorkách odobraných(7) darcovskému žrebcovi aspoň raz do roka na začiatku sezónneho reprodukčného cyklu alebo pred prvým odberom spermy určenej na obchodovanie v čerstvom, chladenom alebo mrazenom stave a najmenej 14 dní po dátume začatia obdobia pobytu s trvaním minimálne 30 dní pred dátumom prvého odberu spermy.]	
	(6) <input type="checkbox"/> [II.3.5.2. Miestom pobytu darcovského žrebeca bola inseminačná stanica na odber spermy počas obdobia aspoň 30 dní pred dátumom prvého odberu spermy a počas obdobia odberu spermy opísanej v časti I, no uvedenú inseminačnú stanicu opustil na zodpovednosť veterinárneho lekára inseminačnej stanice na nepretržité obdobie kratšie ako 14 dní, a/alebo iné koňovité v inseminačnej stanici na odber spermy boli v priamom kontakte s koňovitými, ktoré mali nižší zdravotný štatút.	
	Testy opísané v bode II.3.4 boli vykonané na vzorkách odobraných(7) darcovskému žrebcovi aspoň raz do roka na začiatku sezónneho reprodukčného cyklu alebo pred prvým odberom spermy určenej na obchodovanie v čerstvom, chladenom alebo mrazenom stave a najmenej 14 dní po dátume začatia obdobia pobytu s trvaním minimálne 30 dní pred dátumom prvého odberu spermy	
	a počas obdobia odberu spermy určenej na obchodovanie v čerstvom, chladenom alebo mrazenom stave bol darcovský žrebec podrobený testom opísaným v bode II.3.4:	
	a) pokial ide o infekčnú anémiu koní, jeden z testov opísaných v bode II.3.4.1 sa naposledy vykonal na vzorke krvi odobranej(7) najviac 90 dní pred dátumom odberu spermy opísanej v časti I;	
	b) pokial ide o vírusovú arteritídu koní:	
	(3) <input type="radio"/> budť [jeden z testov opísaných v bode II.3.4.2 sa naposledy vykonal na vzorke odobranej(7) najviac 30 dní pred dátumom odberu spermy opísanej v časti I;]	
	(3) <input type="radio"/> alebo [jeden z testov opísaných v bode II.3.4.2.2 sa vykonal na alikvotnej časti celej spermy darcovského žrebeca odobranej(7) najviac šest mesiacov pred dátumom odberu spermy opísanej v časti I a vzorka krvi odobraná(7) darcovskému žrebcovi počas obdobia šiestich mesiacov reagovala, s pozitívnym výsledkom, v sérumneutralizačnom teste na vírusovú arteritídu koní pri zriedení séra v pomere viac ako 1 : 4;]	
	c) pokial ide o infekčnú metritídu koní, jeden z testov opísaných v bode II.3.4.3 sa naposledy vykonal na troch vzorkách (výteroch) odobranych(7) najviac 60 dní pred dátumom odberu spermy opísanej v časti I	
	(3) <input type="radio"/> budť [dva razy s odstupom najmenej 7 dní;]	
	(3) <input type="radio"/> alebo [raz a bol podrobený PCR alebo PCR v reálnom čase.]]	
	(6) <input type="checkbox"/> [II.3.5.3. Darcovský žrebec nespĺňa podmienky stanovené v kapitole II bode 1.6 písm. a) a b) prílohy D k smernici 92/65/EHS a sperma je odobraná na účely obchodovania v mrazenom stave.	

Part II: Certification

Part II: Certification	II. Zdravotné informácie																				
	(3) o bud' [II.4. (3) o alebo [II.4.	Do spermy neboli pridané žiadne antibiotiká;] Boli pridané tieto antibiotiká alebo kombinácia antibiotík, aby sa po konečnom riedení spermy dosiahla koncentrácia najmenej(8): _____;]																			
	II.5.	Sperma opísaná v časti I bola:																			
	II.5.1.	odobraná, spracovaná, skladovaná a prepravovaná za podmienok, ktoré sú v súlade s požiadavkami kapitoly II oddielu I bodu 1 a kapitoly III oddielu I prílohy D k smernici 92/65/EHS;																			
	II.5.2.	v prípade mrazenej spermy skladovaná počas minimálneho obdobia 30 dní od dátumu odberu spermy;																			
	II.5.3.	odoslaná na miesto nakladky v zaplombovanom kontajneri v súlade s kapitolou III oddielom I bodom 1.4 prílohy D k smernici 92/65/EHS a je označená číslom uvedeným v kolóne I.19.																			
	Poznámky	Tento certifikát zdravia zvierat treba vyplniť podľa poznámok k vyplneniu certifikátov uvedených v kapitole 2 prílohy I k vykonávaciemu nariadeniu Komisie (EÚ) 2020/2235.																			
	Časť I:																				
	Kolónka I.11:	Miesto odoslania zodpovedá inseminačnej stanici na odber spermy, z ktorej sperma pochádza.																			
	Kolónka I.12:	Miesto určenia zodpovedá inseminačnej stanici na odber alebo skladovanie spermy alebo chovu, pre ktorý je sperma určená.																			
	Kolónka I.19:	Uvádzajú sa identifikácia kontajnera a číslo plomby.																			
	Kolónka I.30:	Identita darcu zodpovedá úradnej identifikácií zvierat.																			
		Dátum odberu sa uvádzajú v tomto formáte: dd/mm/rrrr.																			
	Časť II:																				
	Pokyny k vyplneniu tabuľky v bode II.3.6:																				
	Skratky:	<table> <tbody> <tr><td>EIA-1</td><td>prvé testovanie na infekčnú anémiu koní (EIA)</td></tr> <tr><td>EIA-2</td><td>druhé testovanie na infekčnú anémiu koní (EIA)</td></tr> <tr><td>EVA-B1</td><td>prvé testovanie vzorky krvi na vírusovú arteritídu koní (EVA)</td></tr> <tr><td>EVA-B2</td><td>druhé testovanie vzorky krvi na EVA</td></tr> <tr><td>EVA-S1</td><td>prvé testovanie vzorky spermy na EVA</td></tr> <tr><td>EVA-S2</td><td>druhé testovanie vzorky spermy na EVA</td></tr> <tr><td>CEM-11</td><td>prvé testovanie na infekčnú metritídu koní (CEM) na prvej vzorke</td></tr> <tr><td>CEM-12</td><td>prvé testovanie na CEM, druhá vzorka odobraná 7 dní po CEM-11</td></tr> <tr><td>CEM-21</td><td>druhé testovanie na CEM na prvej vzorke</td></tr> <tr><td>CEM-22</td><td>druhé testovanie na CEM, druhá vzorka odobraná 7 dní po CEM-21</td></tr> </tbody> </table>	EIA-1	prvé testovanie na infekčnú anémiu koní (EIA)	EIA-2	druhé testovanie na infekčnú anémiu koní (EIA)	EVA-B1	prvé testovanie vzorky krvi na vírusovú arteritídu koní (EVA)	EVA-B2	druhé testovanie vzorky krvi na EVA	EVA-S1	prvé testovanie vzorky spermy na EVA	EVA-S2	druhé testovanie vzorky spermy na EVA	CEM-11	prvé testovanie na infekčnú metritídu koní (CEM) na prvej vzorke	CEM-12	prvé testovanie na CEM, druhá vzorka odobraná 7 dní po CEM-11	CEM-21	druhé testovanie na CEM na prvej vzorke	CEM-22
